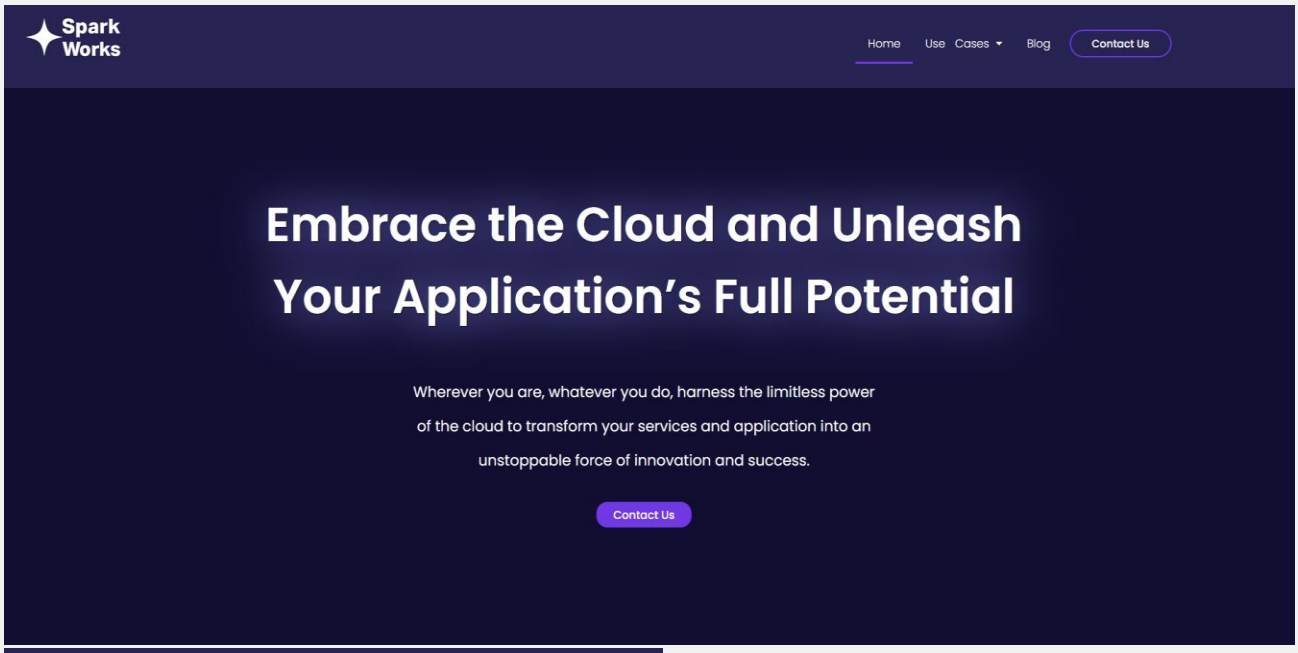
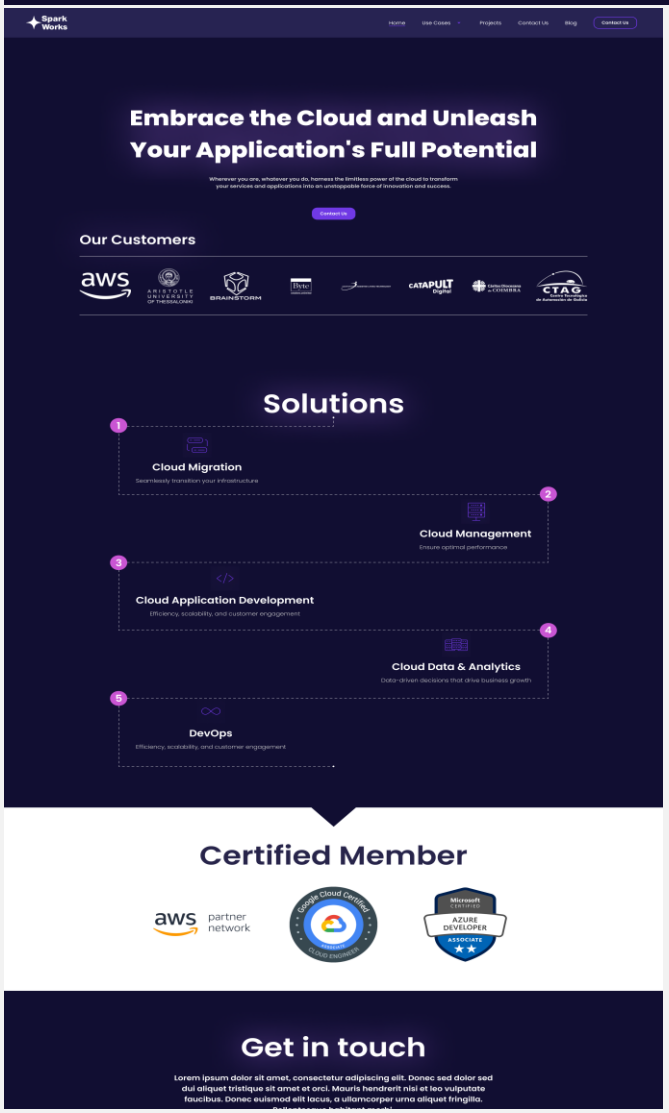
PROJECTS

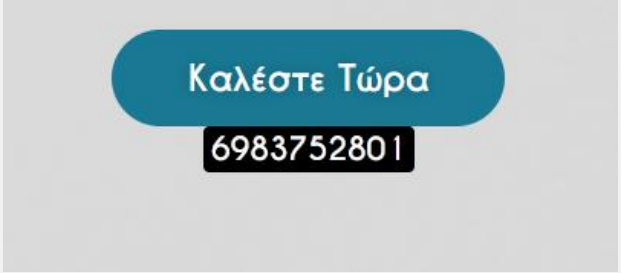
Websites:

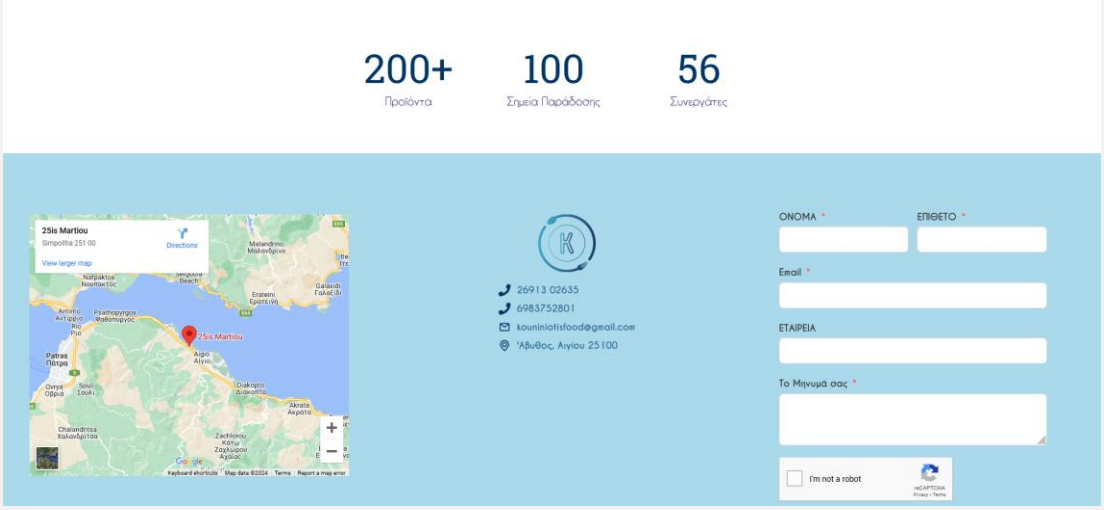




https://www.sparkworks.cloud/

Front-end implementation based on Figma design using WordPress and Elementor.



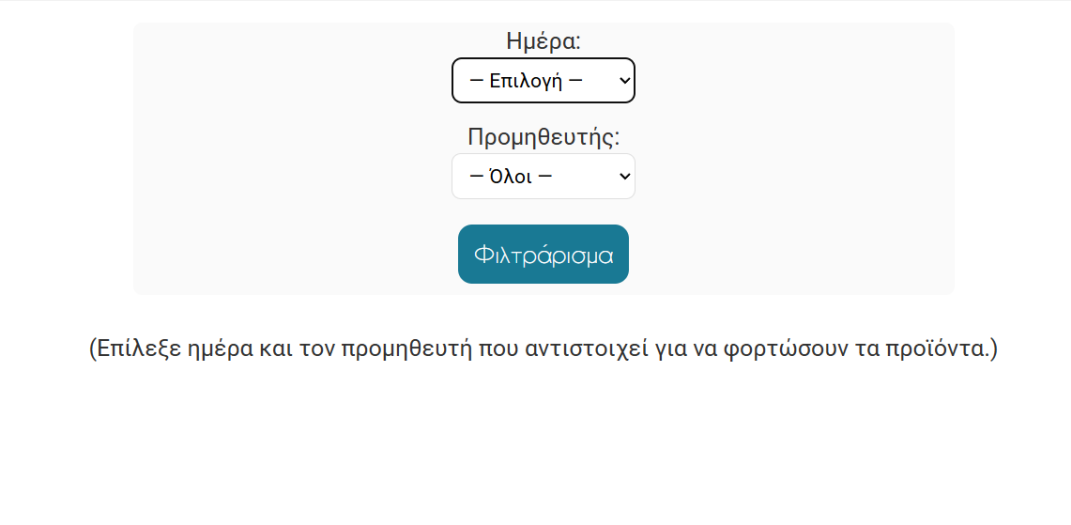


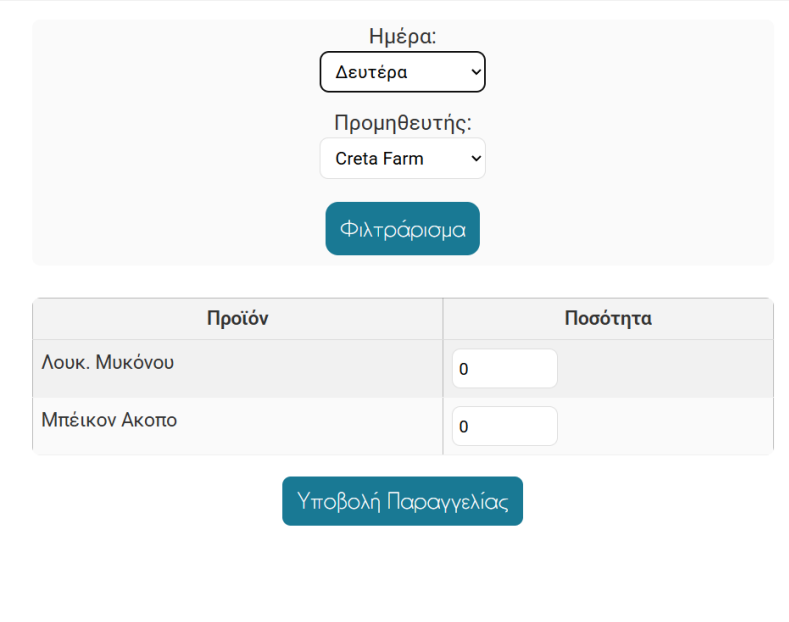
https://kouniniotisfood.gr/

A presentation website, for a small company. Built with WordPress (Elementor builder) and additional CSS5 rules.

Optimized website SEO and managed Google Business Profile to increase organic reach and local search visibility.

Custom B2B Ordering System (Mini ERP for kouniniotisfood.gr)

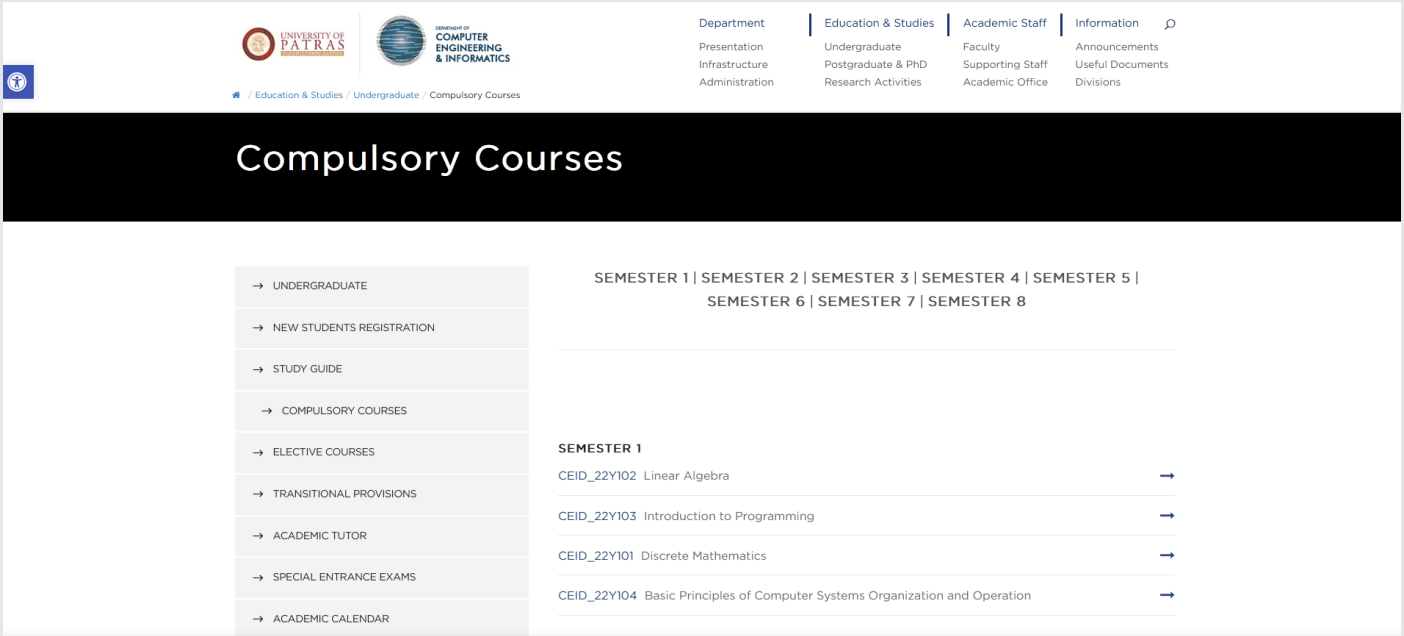


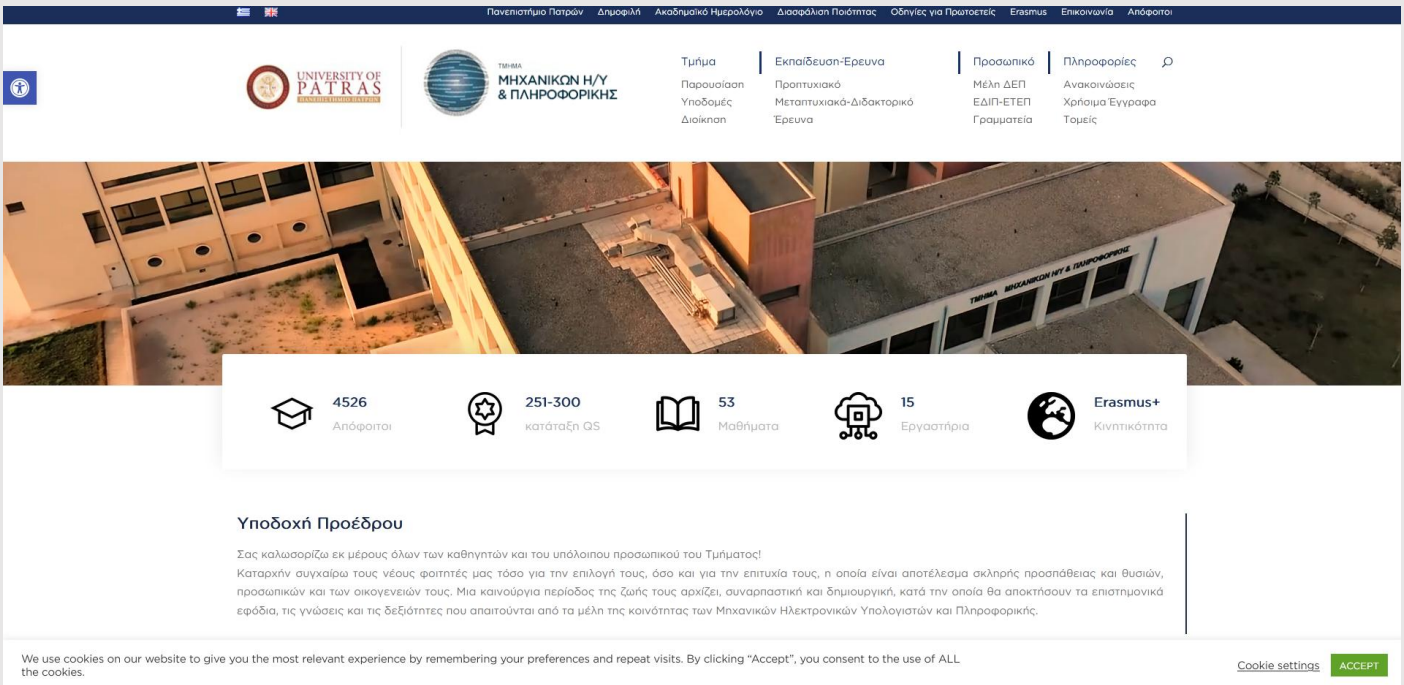


Developed a custom product ordering system for supplier management.

Features

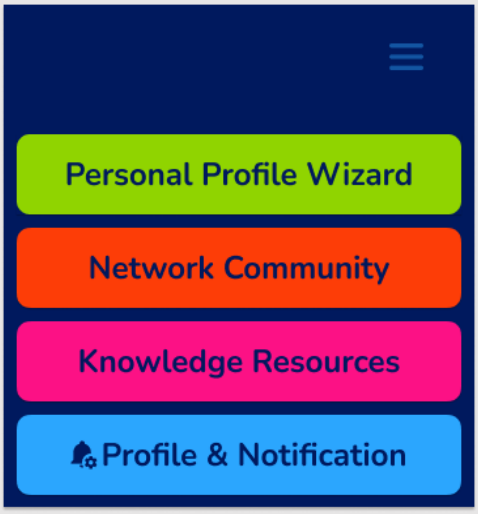
- Dynamic product filtering by **day and supplier**
- Order interface for **200+ products**
- **CSV product import system**
- Automated **email order submission**
- Responsive UI built with **custom CSS**
- Developed using **WordPress, PHP and ACF**





https://www.ceid.upatras.gr/

Website of the University of Patras, made by Vongrid where I had to do:
The data entry (Courses, Courses outlines, Academic Staff and additional educational details according the University),
Translate the website from Greek to English.



https://network.matters-solution.com/

A Network Platform made by Vongrid where I participated, working on the front-end
development of the web application and
grew my skills on responsiveness.
